San Antonio, TX

EDUCATION

University of Texas San Antonio, San Antonio (TX)

2026-2028

EXPERIENCE

Rackspace Technologies, San Antonio (TX)

June 2026 - Present

Global Enterprise Security Intern

- Developed **CERBERUS**, a vulnerability and threat-intelligence platform correlating CISA KEV, EPSS, Shodan exposure data, MITRE ATT&CK mappings, public exploit intelligence, and organizational technology data to prioritize enterprise vulnerabilities.
- Developed **SAGE** (Standards & Governance Engine), a RAG-based compliance Q&A tool grounded in the GRC team's policy corpus with enforced contextual grounding, source provenance tracking, and a feedback loop hardened against prompt injection.
- Developed **ACER** (Automated Credential Exposure Response), integrating Recorded Future and Microsoft Entra APIs to identify credentials exposed on the dark web and automate password remediation with dynamic human-in-the-loop escalation.

Linebarger Goggan Blair and Sampson, San Antonio (TX)

October 2025 - June

2026

Information Technology Security Intern

- Investigated and remediated malware infections using **Correx**, supporting endpoint security and incident-response activities across enterprise systems.
- Developed an AI-assisted help-desk automation that streamlined technical support workflows and increased productivity by **26%**.

North East Independent School District Tech Services, San Antonio (TX)

Summers 2024-25

Field/Technology Intern

- Installed, configured, and maintained computer hardware and peripheral devices across multiple school sites.
- Assisted in deploying network updates and troubleshooting connectivity issues, improving system reliability.

CERTIFICATIONS

Cisco Certified Network Associate	December 2026
CompTIA Security+	April 2025
CompTIA Network+	April 2024
CompTIA PenTest +	April 2026
AWS AI Practitioner	August 2026

HONORS AND AWARDS

Boy Scouts	- Eagle Scout; Achieved the Highest Rank
CyberPatriots	- Phoenix Award; Best Rookie Team
CollegeBoard	- National Merit Semi-Finalist
Rowdy CTF	- 3rd Place in Collegiate Cyber Competition
National Cyber League	- 3rd out of 3600 Teams

SKILLS

Security: Vulnerability Management, Threat Intelligence, Incident Response, MITRE ATT&CK, CISA KEV, EPSS, Shodan

Systems & Networking: Linux, Windows Server, TCP/IP, DNS, DHCP, Routing, Firewalls, Proxmox VE

Programming & Automation: Python, SQL, JavaScript, REST APIs, Git/GitHub, CI/CD

Enterprise/Security Tools: Microsoft Entra ID, Recorded Future, HaloITSM, Correx

PROJECTS

- Multi-Node Security & Infrastructure Lab:** Built and administered a multi-node Proxmox/Linux homelab supporting virtualized servers, segmented networking, NAS storage, and self-hosted services. Configured and troubleshooted routing, DNS, DHCP, firewalls, SSH, SMB/NFS, virtualization, storage, and remote administration across physical and virtual systems. Use the environment to test security tooling, access controls, automation, and service deployments while diagnosing failures across network, OS, virtualization, and application layers.
